

CARACAL standalone automated shallow well microwell plate Adhesive sealer

Wildcat Caracal is a fully electrical operation automated benchtop microwell plate adhesive cut sheet sealer.

The sealer offers a simple straightforward bench top sealing system, the user can operate the system via the easy to use graphical user interface.

The large touch screen allows easy operation, loading the plate in landscape form means the overall size of the unit is compact and easy to maintain.

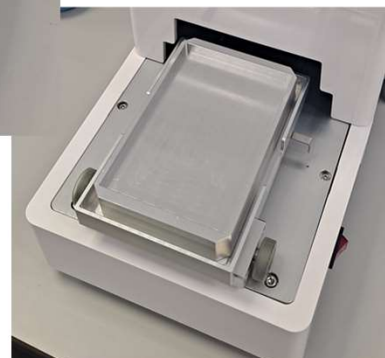

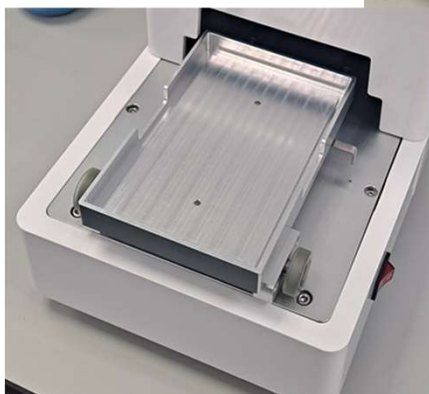

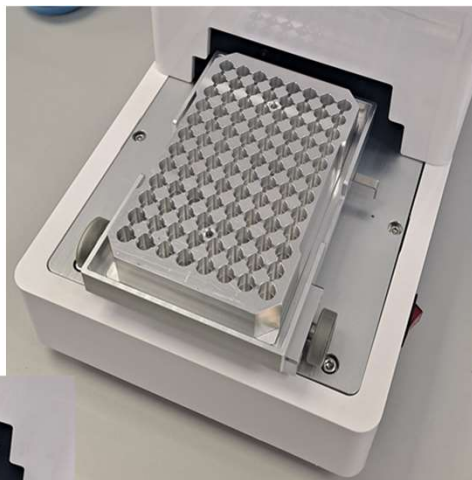

Simple hand loading of the cut sheets on the plate top.

Once loaded the smooth simple shuttle operation is activated by a start button on the user interface.

User can set number of rolls and seal pressure of process can be set according to the customer needs.

Plate heights up to 25mm can be processed with a range of adaptor plates available.

CARACAL standalone automated shallow well microwell plate Adhesive sealer

Product Details:

Model: WCTAS-20
Voltage: 110/220vac
50/60Hz
Power: 400W Max.
Weight: 10kgs

Suggested films:

PCR Foil Seal V1	RBX-1278002	Pack, 100 Sheets
PCR Foil Seal V2	RBX-1298002	Pack, 100 Sheets
qPCR Crystal impact pore	RBX-1218002`	Pack, 100 Sheets
qPCR Crystal Ultra impact pore	RBX-1308002	Pack, 100 Sheets
DMSO resistant foil	RBX-1268002	Pack, 100 Sheets
Breathable Seal	RBX-1328002	Pack, 100 Sheets
qOptic Vison seal	RBX-1228002	Pack, 100 Sheets
